

I'm not robot!

Warcraft: Orcs and Humans is a first real-time strategy game by Blizzard, set in the Kingdom of Azeroth, part of the fictional Warcraft universe. The events that take place in this game are known in Warcraft lore as the First War or the Great War. Players must mine gold and chop wood in order to construct buildings and create new units. From swords to sorcery, all the elements of classic fantasy are here to explore... rating (OldGames): 78% PC DOS Embed Size (px) 344 x 292429 x 357514 x 422599 x 487Text of Warcraft Orcs & Humans Manual ScanUntitled Warcraft has two manuals one for humans and the other for orcs. To view either, simply click on the buttons below...HUMANSORCSIMPORTANT : There are some changes to these manuals that you should be aware of. First, the loading instructions within these documents are for an Apple Macintosh installation (dont worry, the rules for the game are the same). Therefore, you should refer to the README document in the root directory of your CD-ROM for correct PC installation procedures and network functionality. Secondly, please contact us should you require any technical assistance.HUMANSE N T E R T A I N M E N THUMANSCopyright 1994-1995 by Blizzard Entertainment The software and the manual are copyrighted. Center of the BookBlizzard EntertainmentGETTING STARTEDSYSTEM REQUIREMENTSComputer Warcraft requires at least a Macintosh 68030 processor (68040 recommended) and at least 8 MB RAM. Warcraft is also accelerated for Power Macintosh. Controls You will need a Mouse and Keyboard to play Warcraft. Display Warcraft requires a 13" colour monitor with 256 colours and Quicktime 2.0 or greater. Disk Drives A CD-ROM drive and a Hard Disk are required for installation and play. System You must have System 7.0 or greater (7.1 or greater recommended). Sound Sound Manager 3.1 or greater. Two-Player Support Warcraft requires Communication Toolbox tools for 2-player mode.GETTING STARTED INSTALLATIONFor Automatic Installation: Double-click on the Warcraft installer icon on the Warcraft CDROM. Select the Warcraft setup that you wish to install. Necessary system extensions will also be installed at this time. For Manual Installation: Select and drag one of the prepared versions of Warcraft from the CD-ROM onto your hard disk. You may make an alias to original files on the Warcraft CDROM as desired. For speed in launching games, the War Data file should be on the hard disk. If you do not have Sound Manager 3.1, Quicktime 2.1 or Communications Toolbox tools installed on your system, install them from the files supplied in the System Extras folder. Copy Protection Warcraft has a tiered copy protection format. The program requires that your CD-ROM be in the disk drive. If you do not want to keep the CD-ROM in the drive, then you will be asked to enter a specific word from a page in the Game Manual during the startup of each game. The final option is to identify your copy as a Spawned version, and no copy protection will be required (Spawned versions may only play in 2-player mode versus an opponent that has the copy protected version on their machine). We regret that continuing software piracy requires that this minimum form of copy protection be required.1Warcraft: Orcs & HumansSYSTEM EXTRASThe following applications are found in the System Extras folder on the Warcraft CD-ROM. Sound Manager 3.1 provides several important features for Warcraft. If you do not use the Warcraft Installer, you will need to install Sound Manager 3.1 by putting the Sound control panel in the Control Panels folder, and the Sound Manager extension in the Extensions folder. You will need to reboot your system for Sound Manager 3.1 to become active. Quicktime 2.1 is used to play the 3-D rendered sequences during the game. If Quicktime 2.0 or greater is not present on your system, the game will still play, but the movies will not run. If you do not use the Warcraft Installer, you will need to install Quicktime 2.1 by putting the Quicktime, Quicktime Power Plug and Quicktime Musical Instruments files in the Extensions folder. You will need to reboot your system for Quicktime 2.1 to become active. Communications Toolbox Tools appropriate for two-player Warcraft are found in the System Extras folder on the Warcraft CD-ROM. If you do not use the Warcraft Installer, you will need to install Communications Toolbox tools by placing them in the Extensions folder. You do not need to reboot your system for Communications Toolbox tools to be recognised.TROUBLESHOOTINGQ. Why cant I install the game to my hard disk?You must check all System Requirements, especially any mention of hard disk space required, as mentioned in the installation program.Q.The game says I don't have enough memory. What can I do?Warcraft is a very memory intensive game, and you may need to turn off a number of extensions and/or control panels. Freeing up memory in this way is fairly simple: If you are running System 7.5 or later, use the Extensions Manager control panel that shipped with your system. It is suggested that you turn everything off that isn't vital and restart before running Warcraft. To do this conveniently, first save your current configuration by choosing Save Set... from the pop-up menu above the list. Name this set Standard. Next, turn off everything in Extensions Manager except your CD-ROM driver, Sound Manager, Quicktime, Quicktime Power Plug and Quicktime Musical Instruments and choose Save Set... again, naming this set Warcraft. Now, before you run Warcraft, choose your Warcraft set from the popup menu in Extensions Manager, and restart your system. To return to your usual setup, choose Standard from the pop-up menu and restart again. If you are running a System version prior to 7.5, install the Extensions Manager provided with your Warcraft CD-ROM in the System Extras folder. Then follow the above instructions. Also, you may turn off Quicktime to conserve memory space, but movies will not play.Blizzard Entertainment2Q. Why doesnt the sound work? Go to the Sound Control Panel and make sure that output volume is not set on zero. Also make sure that the Warcraft Preferences do not have volume set to zero. If music during the game does not work, make sure that the CD is in the drive and that your Input Source is set to Internal CD and Playthrough is checked. This is set from the Sound Control Panel, under Sound in Options. Q. I cant get the game to run correctly. What else can I do? If you are experiencing problems with the game, tr y configuring for no sound. Tr y disabling extensions to see if there is a conflict. Make sure that you have the basic system requirements as listed in the SYSTEM REQUIREMENTS section of this manual. Q. Can I play against a human opponent? Yes, Warcraft can be played via modem, direct link or network between two players. You may connect to either Macintosh or IBM Warcraft: Orcs & Humans opponents. Warcraft uses a unique Spawning technology that allows head-to-head play by installing multiple copies from the original CD-ROM. To play a two player game, at least one of the players will need the original copy of Warcraft. A detailed description for installing spawned copies of Warcraft and playing head-to-head games is in the readme text file on the Warcraft CD-ROM. Q. I have problems connecting for a 2-player game with AutoDoubler on - Why? There is an incompatibility with Power Macintoshes, Auto-Doubler and two-player Warcraft games using the Communications Toolbox. To avoid this conflict, boot your system without AutoDoubler
